

Tiago Barros

I'm Tiago, a software engineering student focused on graphics and systems programming, with a strong interest in game development and video-game modding. Experienced in building custom engines, rendering systems, and backend services. I'm particularly interested in systems design, computer graphics, operating systems, and mathematics, and I also enjoy traditional painting and electronics outside of coding.

EDUCATION

Software Engineer

🏢 Instituto Superior de Engenharia do Porto 📅 current

IT Technician

🏢 Colégio de Gaia 📅 2020 – 2023

- Final grade: 19.1
- PAP: "Himawari2D - A basic Java Game Engine"

EXPERIENCE

Internship

🏢 RFA 📅 July 2022 – April 2023 📍 Vila Nova de Gaia, Portugal

Keywords: *Application development, Backend development, Javascript ecosystem, PHP, File sharing*

Designed and implemented a secure backend file sharing module with role-based access in PHP and MySQL used by students and staff to securely share and manage coursework files.

Developed an online schooling platform with Node.js and MongoDB to aid the company in scheduling classes, recording student attendance, and notify students of upcoming classes, respective teachers and other events.

OTHER ACTIVITIES AND PROJECTS

TOPAS 2022

3rd place - programming contest for highschoolers

TOPAS 2023

8th place

Tecla 2023

Participation - programming contest

FCUP GameJam 2024

2nd place - Game development contest. Developed core mechanics and enemy patterning for a stealth game in C#

SKILLS

Programming Languages

C/C++, Java, C#, JavaScript / TypeScript, PHP

Game Dev & Graphics

Raylib, SDL, Unity, GameMaker Studio, OpenGL

Backend & Databases

.NET, Node.js, SQLite3, MySQL, MongoDB

Frontend / UI

Vue, JavaFX, Java Swing, Windows Forms

Tooling

Git, Maven, Make&CMake

Familiar With

Godot, Three.js, EF Core, JDBC, x86 Assembly, Prolog

LANGUAGES

Portuguese

Mother tongue

English

C1

Japanese

Unofficially JLPT N3
